USAID's Primary Health Care Project (PHCP) partners with Iraq's Ministry of Health (MOH) to strengthen its delivery of primary health care services throughout the country, focusing on mother and child health services for the most vulnerable Iraqis.

The project also works with the Government of Iraq (GOI) to improve the standard and quality of 36 "model" clinics to serve as a prototype for further national replication.

USAID / PHCP initiative in collaboration with Iraqi MoH to develop PHC Model Clinics as part of 360 PHCPI targeted clinics and setting the standard for improved primary health care services to its main beneficiaries - women, children and marginalized populations in communities throughout Iraq.

Dr. Ali Shudar, Directorate General of health, recently conducted a meeting with Dr. Bashr Abdul Fattah, Najaf AlShemaly PHC District Director, and the directors of both Model Clinics in the Najaf District. During the meeting they discussed the importance of renovating the clinic to help improve health services.

Also during the meeting they created a budget that will be allocated to renovating the two Model Clinics in Najaf District.

Since the meeting renovations have started on the two clinics, and the staff members of both clinics are awaiting the grand opening of the two clinic.
